Calculation Service

■ We can provide a calculation of deformation for thin walled components when clamping with the chuck

Please note:

The roundness of the work piece is affected by the clamping, as well as by the accuracy of the machine, the tool and the work piece characteristic.

Please note:

The roundness of the work piece is affected by the clamping, as well as by the accuracy of the machine, the tool and the work piece characteristic.

Calculation service

■ We can calculate the necessary gripforce for SMW-AUTOBLOK chucks for your machining process.
